Art Unit: 2665

1. Claims 1, 3-17, 19-36 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The two wireless gateways (230s), one locates within Subscriber Access Unit (14) and one locates within Base Station Processor (16) connected by a wireless link (26) are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). To be more specific, according to the specification disclosure regarding Figures 1 and 2, the point-to-point connection between a sending node (12) and a receiving node (30) via a wireless link (26) requires two wireless gateways (230s), one locates within Subscriber Access Unit (14) and one locates within Base Station Processor (16) for the method, system, and computer program codes to be functional and operational. The claimed method, system, and computer program codes only includes one wireless gateway, which makes the invention non-enabled since it is unclear as to which wireless gateway is referring to or is intended for the claimed invention. It is also ambiguous as to whether the system will be fully functional or operational with only one wireless gateway exists.

2. Claim 32 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 32, line 1, "the TCP/IP stack" lacks antecedent basis.

3. Claims 1, 3-17, 19-36 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, first and/or second paragraphs, set forth in this Office action.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2665

Wicki et al., Haartsen, Shimizu et al., and Mizutani et al. are additionally cited to show the feature of message transmission between sender and receiver utilizing wireless link and message receipt acknowledgement similar to the claimed invention
